DeFoamer 2500

GENERAL DESCRIPTION

DEFOAMER 2500 is designed for aqueous foaming industrial systems that require quick foam knock-down and long-lasting foam prevention.

Since **DEFOAMER 2500** is a water-based product and contains no oily hydrocarbons or silicones, it is compatible with most processing systems. This product is designed to perform effectively in systems which contain a high surfactant concentration. **DEFOAMER 2500** is also effective for use in water curtain booths where foam is objectionable.

DIRECTIONS FOR USE

The optimum dosage levels of **DEFOAMER 2500** depend on each individual processing system and can best be determined through trial evaluations.

TYPICAL PROPERTIES

Appearance:	Opaque, off white
Specific Gravity:	0.90
Solubility:	Complete
