READY CONCRETE RELEASE

Concrete Release Agent

GENERAL DESCRIPTION:

READY CONCRETE RELEASE: Is a concrete release agent.

Ready Concrete Release is applied to the surface of the forms prior to pouring.

Ready Concrete Release provides a non-stick coating on the forms and prevents the concrete from sticking together during packaging and prior to use.

ADVANTAGES / FEATURES:

- **Liquid:** Water-soluble, allows for easy handling and equipment feed.
- **Multi-Surface Safe:** Will not harm the surface of the concrete. Safe to use on glass, mild and stainless steel, plastic, wood and rubber. Safe on painted surfaces.
- **Non-Toxic/Solvent Free:** Contains no hydrocarbon solvents.
- **Non-Stick Coating:** Provides a non-stick coating on the surface of the forms and allows for easy separation.

USE PROCEDURES:

Ready Concrete Release: Use full strength. (May be diluted with water in some instances.)

Principal Uses:

- **Ready Concrete Release:** Provides a non-stick coating on the surface of the concrete forms and allows for easy separation.
